## **EFI's Innovative Sliding Glass Door and Room Divider Systems**

### **Reflect More than Sophisticated Modern Designs**

***High Function and Eco-Friendly Options Ideal for Residential and Commercial Spaces***

***Double Duty Panels Include Whiteboard, Magnetic Options***

KERNERSVILLE, N.C., December 2, 2010 – [EFI](#), a leader in designing and manufacturing original glass and aluminum interior products, officially presents its exclusive commercial and residential [interior sliding glass doors and room divider systems](#). The appeal is the ultimate blend of clean European design and multi-faceted function.

Featuring exquisite modern architectural designs, custom applications include eco-friendly glass fabrication and magnetized whiteboard panels—even permanent markers are rendered temporary, and can be simply wiped off. A sampling of products and installations can be viewed at [www.efi-us.com/SlidingDoors](http://www.efi-us.com/SlidingDoors).

“Our newest frame options include custom white glass constructed with a magnetic backer for the ultimate in dual functionality,” said Kevin Moore, president of EFI. “Our custom panels provide privacy and function as whiteboards and magnetic boards all in one, making them ideal for workplaces, classrooms, hospitals or even home offices.”

EFI's ground-breaking, European engineered RS sliding doors for both fine homes and commercial spaces epitomize sleek, contemporary design while offering the maximum storage space for closets and built-ins. Featuring concealed hardware for a streamlined aesthetic, EFI's high performance system can be customized to transform spaces with translucent, opaque and patterned glass, including an environmentally-friendly Eco Resin, available in a range of colors, textures and finishes, including organic inter-layers.

EFI's Air System for sliding doors, room dividers, and closets can either be recessed into nearly any flooring for a visually uncluttered appearance or be entirely top-mounted, which eliminates floor tracks for a stunning, architectural statement.
